PROFESSIONAL SUMMARY

Computer Science Engineering student (B.Tech, Chandigarh University, CGPA 7.66) with hands-on experience building full-stack applications using C++, Python, JavaScript, and SQL. Solved 200+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks, and recognized as a Semi-National Finalist at Flipkart GRID 7.0. IBM-certified in SQL with practical exposure to REST APIs, relational databases, and the software development lifecycle. Open-source contributor (GSSoC 2025) seeking an entry-level Software Engineer / Software Developer role to apply strong problem-solving and full-stack development skills.

TECHNICAL SKILLS

- **Languages:** C++, Python, Java JavaScript, HTML5, CSS3, SQL
- **Databases:** MySQL, PostgreSQL, SQLite
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Software Development Life Cycle (SDLC), REST API Design, NLP & Text Similarity
- **Tools & Platforms:** Git, GitHub, VS Code, Flask, scikit-learn, Google Colab, Windows

EDUCATION

Chandigarh University, Mohali — B.Tech, Computer Science Engineering (CGPA: 7.66) <i>Mohali, India</i>	11/2023 – 06/2027
British English School, Gaya — 12th (CBSE), 76.6% <i>Gaya, India</i>	2022 - 2023
British English School, Gaya — 10th (CBSE), 91.8% <i>Gaya, India</i>	2020 - 2021

PROJECTS

CEREVIA – Mental Health Mood Tracker	<i>C++, Python, JavaScript, Flask, SQLite</i>
• Built a full-stack mental wellness application enabling daily mood tracking, journaling, and emotional-trend analysis for users. • Designed a sentiment-aware chatbot with crisis-support recommendations to strengthen user well-being and engagement. • Modeled and managed a SQLite database to store user profiles, mood logs, journal entries, and chatbot interactions. • Implemented secure PIN-based authentication and RESTful APIs in Flask, enabling seamless frontend-backend communication. • Improved user engagement by delivering real-time assistance, secure data handling, and a responsive, accessible experience.	
Weather App – Real-Time Weather Dashboard	<i>HTML, CSS, JavaScript, REST API</i>
• Developed a responsive weather application displaying real-time temperature, humidity, and wind-speed data with a dynamic UI. • Integrated the OpenWeatherMap REST API using Fetch, Promises, and async/await for smooth asynchronous data retrieval. • Added city-based search with input validation and robust API error handling across multiple screen sizes. • Optimized DOM manipulation to cut page load time by 20%, improving overall user experience.	
ATS Resume Screener & Job-Fit Matcher	<i>Python, Flask, scikit-learn, SQL</i>
• Built a web application that scores resume-to-job-description match using TF-IDF vectorization and cosine similarity. • Parsed and extracted text from PDF/DOCX resumes to perform automated keyword and skills-gap analysis. • Designed a Flask-based interface allowing users to upload a resume and job description and receive an instant match score. • Stored scan history and match results in a SQL database to track resume iterations over time.	

ACHIEVEMENTS & EXTRACURRICULARS

- Solved 200+ Data Structures & Algorithms problems on LeetCode strengthening problem-solving and coding proficiency.
- Semi-National Finalist, Flipkart GRID 7.0 — recognized among top teams nationally in a large-scale hackathon.
- Open-source contributor, GSSoC 2025 — contributed to live web development projects in a collaborative, version-controlled environment.
- Content Team Member, NAVPRAYAS — created and managed digital content, building communication and teamwork skills.
